

User Guide — Page 1

Section 1. Getting started.

Register on the portal and confirm your email.

The first login is done via the link from the email.

The password must be at least 8 characters.

User Guide — Page 2

Section 2. Data import.

CSV and XLSX formats up to 50 MB are supported.

Import is launched on the 'Data' -> 'Upload' tab.

Import errors are shown in the operations log.

User Guide — Page 3

Section 3. Security.

Enable two-factor authentication in the settings.

The session ends automatically after 30 minutes of inactivity.

Data export is available to administrators only.
